

# BONFIRE & FIREWORK SAFETY

A hard hitting, thought provoking presentation which will highlight the considerations undertaken when building bonfires and the dangers associated with fireworks.

## Bonfire/ Firework Safety

During the months of October and November almost 1000 people suffer serious burns and injuries leading to lifelong scarring, due to the misuse of fireworks and bonfires.

In the weeks leading up to any religious festivals throughout the year where bonfires and fireworks are to be used, this hard hitting, thought provoking presentation will highlight the considerations undertaken and dangers associated with building bonfires and careless use of fireworks.

Utilising over 30 years experience in the Fire and Rescue Service aided with photographs and video clips, 'Manchester Safety Training' will show the serious, sometimes fatal injuries sustained when using fireworks, and the heartache and pain suffered by family and friends. The workshop will prove that organized events are far safer than a private party in a garden or on waste land. The audience will also be made aware of the legal requirements and legislation in force, for the sale and use of fireworks, and the penalties imposed for not adhering to them.

All 'Manchester Safety Training' workshops have been positively received by a number of schools and Social Groups throughout Manchester and the North West.

SAFETY TRAINING

## About Our Services

Every year in the UK people suffer horrific injuries and fatalities that could have been prevented or avoided with some basic knowledge and training. The sole aim at 'Manchester Safety Training' is to provide a safer environment in the home, at work and on our roads.

Manchester Safety Training offers consultancy through Steve Brooks, who has over 30 years experience as an operational Fire Fighter in Manchester Fire and Rescue Service, including 4 years as a Community Fire Safety Officer educating people throughout the social demographic. Throughout his career Steve has also been a practicing first aid/trauma trainer, delivering basic life skills including first aid and life support workshops.

With a vast experience, training and a dedication to the cause, Steve provides various workshops to a recognized industry standard. All courses by 'Manchester Safety Training' can be delivered on client's premises, and can be tailored to be company/industry specific. The presentations can also be bespoke to target audiences including Business Groups, Parents/Guardians, Carers, Local Community Schemes (Home Watch etc) and High School Students. Each workshop is communicated through presentations, discussion topics and role plays and can vary between 45 minutes and 1 hour, depending on your requirements.
